Five days. One transformation.

Not every adult dog walks straight into group daycare and feels at home. The Adult Social Training uses threshold-based integration — introducing stimulation gradually, always below the point of stress, until your dog is genuinely ready. The five days are non-consecutive and progress is never rushed.

Day 1 · Initial Orientation and One-on-One Play

A calm, well-socialised mentor dog and a low-stimulation setting — space to explore at their own pace.

Day 2 · Gradual Group Integration

Small, carefully selected playgroups matched to your dog's temperament and energy level, closely supervised.

Day 3 · Structured Socialisation Exercises

Recognising social cues; play pauses and gentle redirection to respect boundaries and share space calmly.

Day 4 · Calm and Quiet Time Training

Rest periods and calm behaviour after play — daycare has both active and quiet moments.

Day 5 · Confidence Building and Parent Review

Daycare equipment and play spaces, then a comprehensive review of progress, achievements and recommendations.

Who it's for

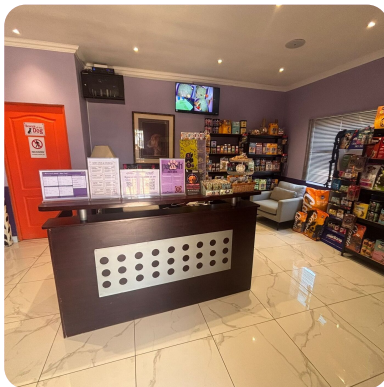

- ✓ Dogs who find group environments overwhelming
